

An Apology...

AMG wish to apologise for taking so long in bringing out virtual instruments featuring our unparalleled sounds. We are sorry that you have been given the impression that mediocrity is acceptable. That software companies know anything about sampled sounds or that sample quality only applies to sounds primarily suitable for West Coast AOR - we are truly sorry and intend to set the record straight. Although we wish our previous good record to be taken into account we realise that we will have to prove once again that you can hear the difference between AMG and anyone else. Whether it's Drum&Bass, Celtic, hip hop, synthpop, R&B, live drums or percussion, Industrial or whatever - an AMG library will have a distinct quality you could never mistake for simply bland perfection. By working with the finest producers in their fields every library bears it's own unique stamp of innovation and inspiration that sets AMG apart from the crowd. Come Autumn 2004 you will finally be able to hear what you've been missing...

An unparalleled pedigree in sampled sound:

Legendary sample libraries from artists such as Norman Cook, Vince Clarke, Coldcut, Black II Black, Lukecage, Phil Gould, Neil Conti, and many more!
Internationally acclaimed for more than 15 years with countless awards and 5 star reviews!
A catalogue of well over 400 CDs - more inspiring, diverse and sexy than any other library on Earth!

A tradition of innovation:

- World's first loop-based sample library
- World's first REX, REX2 & ReFill Libraries
- World's first Apple Loops CDs
- World's first CD of GarageBand Instruments
- It goes without saying that the samples are always cutting edge...

ONE - the ultimate loop engine.
Amazing new loop libraries, powerful beat editing, search features and much more!

Kick-Ass Brass! - simply the best sounding pop/rock horn section just got better! Already awarded 5 stars by Sound On Sound now with additional instruments - Baritone Sax & Muted Trumpet - in one amazing virtual instrument!
