To install or upgrade CAPS Warn, it is important that you follow these instructions exactly:

1. DO NOT drag anything anywhere.

2. DO NOT double-click **CAPS Warn.prefPane**

3. Make that System Preferences is NOT running.

4. Right- or Control- click **CAPS Warn.prefPane** and choose "Open" from the menu that pops up.

5. If you get a prompt about an unidentified developer, click the "Open" button in the prompt window.

6. If you get a question about how to install it, install it for "this user only".

7. The CAPS Warn preference pane will now open in System Preferences. Make sure the settings are as you desire, make sure "Enable CAPS Warn" is checked and close System Preferences.
