

Humanity Software End-User License Agreement ("EULA"): HumanityTHUNDER – Trial Edition

Copyright © 2005,2006 Advance Guard Software Guild Corp. – All Rights Reserved

HumanityTHUNDER® is a standard Windows service application written in C# .NET that provides background processing support for IIS web Servers. This small, but important utility keeps ASP.NET web sites refreshed to the server's cache. Even low-volume web sites appear as though they are well-used sites from the perspective of the site visitor. Anyone using your site will enjoy rapidly loading web pages even when the site hasn't had activity for a long time. Typically, ASP.NET web sites that haven't been accessed can often take minutes for the first page to appear in the user's browser because the site is not "fresh" and has been flushed from the web server's cache due to timeouts. The **HumanityTHUNDER**® utility works by making asynchronous web requests to the web sites and pages that are defined in its configurations file. Every 4 or 5 minutes this application cycles through your web sites loading their primary web pages into the web server's cache. This action causes ASP.NET web pages and any business objects referenced by them to be re-compiled before being cached. Now, when a web site visitor tries to access one of your low-volume websites, the website pages load very quickly into their browser.

Generally speaking, provided that you agree to the lawyer-speak below you may use the trial edition software for yourself or your business. It cannot be redistributed without permission, or be sold to third party, and you cannot use it directly for monetary gain by combining it with other software or services. The Trial Edition can be used against a single (Primary) website. For a small fee (\$19.95 USD), you can move up to the Standard Edition that can refresh up to 11 websites per cycle. As a bonus, the Standard Edition includes full source code for this Windows service, so you are free to make any changes in the program that you want for your own use.

NOTE: HumanityTHUNDER® - Trial/Standard Edition (Requirements)

- All versions of the HumanityTHUNDER Software are "server-based" and require an installed copy of the IIS 5.0+ web server and a Windows server operating system. This is NOT a desktop application for end-users. If you do not understand what this means then the software is probably not going to be useful to you or your organization.
- The personal and professional editions of the software require Microsoft's .NET Runtime 2.0 (available from Microsoft Downloads)
- Minimum 256Mb system memory (RAM). 512Mb preferred.

The HumanityTHUNDER® Windows Service application is available in several versions:

a) HumanityTHUNDER® - Trial Edition

- Software is distributed "as-is" and you bear all risks of using it.
- May not be resold

b) HumanityTHUNDER® - Standard Edition

- Software is licensed on a per-server basis; one copy per server
- No license expiry, no spyware, no adware, no malware
- An inexpensive license (\$19.95 USD) includes full application source code.
- Can refresh 10-100 websites per cycle on the average server.
