

# Met Sat Getter – Getting Started

## DA Software

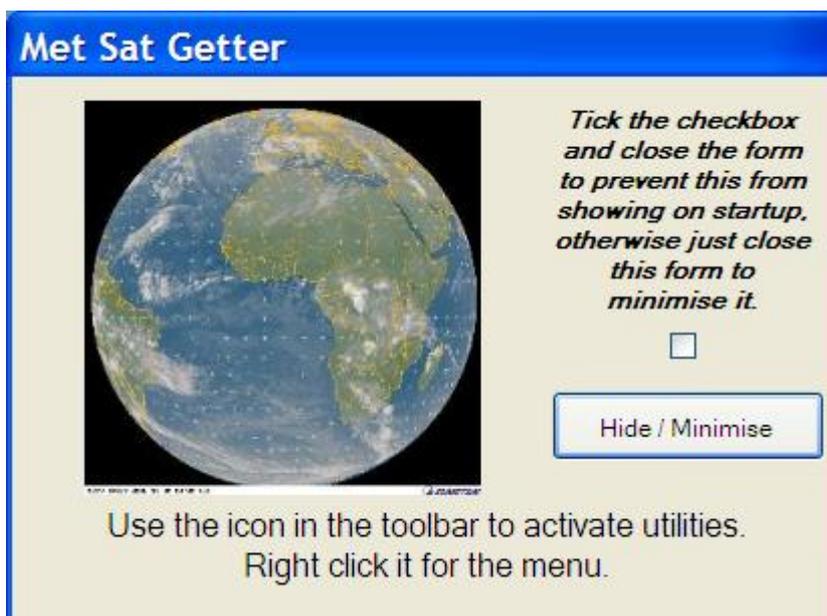

---

### Installing the program

Unzip the downloaded file to a folder of your choice. If you do not have the .NET framework installed on your PC run setup.exe, otherwise you can just run the GMSInstaller.msi file.

You should really consider setting the program to run on start-up by adding it to your start up folder. You have the option to do this during the set-up.

When MetSatGetter first runs you will see this form

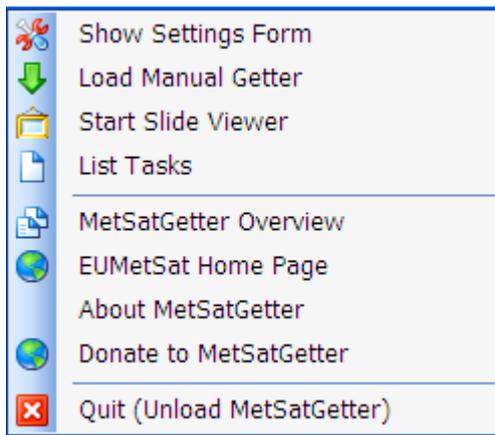

You can either minimise this, or permanently hide it.

To minimise just click 'Hide / Minimise'. To permanently hide it tick the box and then click 'Hide / Minimise'

Note: When MetSatGetter runs ***there is no interface other than the icon in the system tray if the form has been hidden.***

Right clicking this gets you the menu.

Go to 'Show Settings Form' to set up automated downloads. See the help there for details

Go to 'Load Manual Getter' to perform manual downloads. See help there for details.
