

# Toolbar Revision History

This document contains details regarding improvements of the Toolbar FileMaker plug-in.

## **Toolbar version 1.0.4.28 for Windows and Mac OS X**

- Improved: Toolbar is now compatible to FileMaker 12.
- Fixed: Script attached to a tab instead of a button could produce a crash. This has been addressed.

## **Toolbar version 1.0.3.25 for Windows and Mac OS X**

- Improved: Added script caching facilities, which helps to improve the script starting speed.
- Improved: Added compatibility to '2empowerFM Developer Assistant' plug-in.

## **Toolbar version 1.0.2.22 for Windows and Mac OS X**

- Improved: Toolbar buttons can be now aligned using the 'Justify' style, which can be used to resize all button lines to the width of the widest row.

## **Toolbar version 1.0.1.21 for Windows and Mac OS X**

- Improved: Toolbar is now compatible to FileMaker 11.
- Improved: Toolbar can be attached to the specific database now, which means that Toolbar(s) will be displayed only when the necessary database is active.
- Improved: Toolbars may contain multiple lines now. Use a 'line-break' button type to make the next button move to the new line.
- Improved: To comply with the multiple lines concept, multi-line tabs and buttons can be by 'left', 'right', and 'center' aligned.
- Improved: Tab click can also active a script now, beside activating a particular Tab.
- Improved: Toolbar can be attached to any edge of the window (Windows) or screen (Mac OS X).
